Infusion Pump KL-8071A

This pump has been designed to be simple, safe and reliable in operation, which makes it ideal for all veterinary infusion applications.

Setting and operating is easy and clear due to a large LCD display screen.

Alarms and Settings are displayed in words or abbreviations allowing errors to be identified easily.

INFUSION SPECIFICATIONS

Flow rate	0.1–1200 ml/h in 0.1 ml/h increments
Volume to be infused	1–20000 ml
Accuracy	+ or - 3%
Keep Vein Open rate	1-5 ml/h

The pump incorporates a powerful step motor driving a linear peristaltic pumping mechanism giving a stable, consistent output.

The motor can be powered by either mains or rechargeable Li-Ion battery.

Pump can be pole mounted using fitted clamp or hung as required.

A number of additional features which include: real-time infused volume, bolus rate, bolus volume, automatic power switch, mute key, purge, system memory, key locker along with the ability to change flow rate without stopping the pump all help to make this a very useful and versatile addition to your practice infusion system.

30065

Catalogue Number
30064-10
or 30064-40

Saphir Clipper with Blade No. 10 or No. 40

Comes complete with two batteries and a dual port charger. Each battery provides 50 minutes clipping from a 45 minute charge. Quiet and lightweight, perfect for small animal clipping but powerful enough for use on large animals too.

Style Mini Trimmer

Trims quietly and with precision around paws, eyes and tails of small animals. Ideal for final styling of a dog.

Catalogue Number
30063

Animal Clippers

Oster PRO 3000i Cordless Clipper

The new Oster Pro 3000i Cordless Clipper is slim, lightweight and powerful with a clipping speed of 3000 strokes per minute. It is compatible with all A5 detachable blades making it a versatile cordless clipper. The Li-ion battery provides long lasting sustainable cordless power. It is a single speed clipper but, at 3000 strokes per minute, it has all the power you need.

This heavy duty cordless clipper is a really exciting addition to our range of professional clippers. Great power and long battery life means that this is a really good cordless option.

Catalogue Number 30075

Andis Pulse ZR II Vet Pack

The famous Pulse ZR now comes with removable batteries to ensure you never run out of power! This powerful clipper features a heavy duty motor with 5 speeds to ensure you can efficiently groom all coat types – no matter what state they are in – and ensure a perfect finish every time.

- The lithium-ion battery delivers 2.5 hours run time with a recharge time of 2 hours.
- It comes with No. 10 ceramic blade, while the Vet Pack is equipped with No. 40 stainless steel blade.
- Comes complete with two batteries, charger, blade drive, oil, adaptors and a carry case.

Catalogue Number 30070

Animal Clippers

Saphir Horse Clipper

A powerful, rechargeable clipper designed for all-day, heavy-duty use. Thanks to the lithium-ionic battery technology, there is no need for power cord at all. The clipper will run continuously for one hour with a fully charged battery and the recharging time is less than 45 minutes.

The Saphir Horse offers you all the freedom you need, either in your surgery or outside in the barn or stable.

Supplied with two high capacity batteries, charger unit, #10W blades and a carry case.

Catalogue Number 30079

We have the full Hauptner–Herberholz catalogue of instruments and equipment. Please contact us for more information on any of these products and services; we are always happy to receive your enquiries.

A PDF version of the full catalogue is available to view and download here:-

<https://vetsonic.co.uk/instruments.html>

In addition to supply of new instruments and equipment, Vetsonic also offers a repair and refurbishment service for Hauptner-Herberholz products. If you have any instruments, e.g. emasculators, dehorning shears, stomach pumps, etc. that need some TLC, please get in touch to find out how we can help.

We now have our own Hauptner factory trained technician specialising in clipper servicing and blade sharpening, with fast turnaround times.

Electric 2000 PLUS - Cattle clipper -

NEW:

- ✓ best silent running (approx. 75 dB)
- ✓ almost no vibration
- ✓ optimised gear system

Adjustment of blades on the Electric 2000 PLUS - Cattle and horse clipper -

- 1) Remove the old blades by unfastening the regulating nut until the screw is screwable and easy to pull out. Then remove the blades. Please pay attention to the regulating nut, that it does not loosen the screw to avoid the losing of single spare parts.
 - 2) Take a brush for cleaning the clipping head carefully.
 - 3) Adjust the eccentric block in such a way, so that it is possible to put in the guide of the upper blade easily. Please make sure, that the surface of the blades is totally clean.
 - 4) Put in the lower blade and adjust the screw, so that the screw can hold the blades.
 - 5) Turn the regulating nut until you recognise the first resistance and afterwards again 1 1/4 of a turn (Please see the marking on the regulating nut)
- > The clipper is now ready to use! It is also important to oil the blades during the clipping process several times in switched-on mode.

Each cattle and horse clipper, as well as sheep shearing machines, are always delivered complete including blades, oiler and instruction book in a strong carrying case.

Electric 2000 PLUS - Spare parts **- for the clipper for cattle and** **for horses -**

Repairing and sharpening:

If your cattle or horse clipper or your sheep shearing machine should be repaired or the blades have to be sharpened, please send us your clipper/shearing machine or just the blades. Add a small note describing which part has to be repaired or which irregularities you have noticed and we will do this work for you! If you would like to get an estimation of costs, please note this as well as your contact details, like address and telephone number. Our address is as follows:

H. Hauptner und Richard Herberholz GmbH und Co. KG
Kuller Str. 3844
42651 Solingen

Hoof knives

Manual work with the following quality control guarantees a good product!

- ✓ guarantees an optimal grip and load transmission because of an ergonomic shaped wooden handle
- ✓ we use only high quality german steel
- ✓ long lasting cutting output
- ✓ accurate manufacturing
- ✓ strict quality control during the whole manufacturing process
- ✓ excellent product reliability because of decades of experience and the optimal proportion of hardness / flexibility and the material viscosity
- ✓ optimal price performance ratio

Ordering and Returns Policy

Minimum Order Value:

Orders above £250 in value will be eligible for free delivery to UK Mainland practices. Exceptions are addresses in Northern Ireland, Republic of Ireland, Isle of Man, Isle of Wight, Scilly Isles, Channel Isles, Scottish Islands, Scottish Highlands and all other overseas destinations.

Vetsonic Returns Policy:

All goods for return/for credit must be agreed with Vetsonic prior to sending back. All carriage charges must be paid for by the customer.

Any product which may not be required or ordered in error must be returned to Vetsonic within 5 days of receipt.

All medicinal products intended for return must be stored in the required conditions suitable for the product prior to return. Particular regard must be given to refrigerated items and controlled drugs. A signed declaration from the Veterinary Surgeon to this effect must be received by Vetsonic with the goods upon their return.

Credit will only be issued to products returned in good condition, in original unopened packaging following confirmation of storage in accordance with the product data sheet recommendations.

Procedure for Reporting Damage:

Damages must be reported within 48 hours of receipt.

Photographs should be taken in situ and emailed to info@vetsonic.com.
